FROM: ROBERT KOENTOP, Environmental Specialist **RK**
Field Operations Branch

SUBJECT: Ford Motor Company - A. L. Taylor Site

RECEIVED
JUL 30 1980
DIV. OF HAZARDOUS MATERIAL
AND WASTE MGMT.

On July 25, 1980, I met with Mr. Bill Fluhr (Liquid Processor's, Inc.) and Mr. Sam Horton (Ford Engineering representative) at the Valley of the Drums. The meeting's intent was to segregate Ford drums containing materials that have been, or are presently being permitted for disposal as landfill in Kentucky.

The following materials were segregated:

1. Ohio Sealers (4G-series)
 - (a) black - 4G40A
 - (b) cream - 4G173A
 - (c) pink - 4G139B
 - (d) gray - 4G197, 4G149B
2. Adhesives
 - (a) black - 2G150A

A total of 34 drums were segregated (33 sealers and 1 adhesive). Three additional drums were also tentatively segregated - these will be reinspected to specifically determine their contents.

Ford is requesting special permission to landfill these 34 drums at Smith's Landfill (Bullitt County).

NOTE: Pat Haight verbally informed me that these materials could be disposed at Smith's.
